— between Table Tennis and Ice and Roller Skating?

Both appear in the 38 strong 'Know the Game' series of official guides to the rules of Britain's most popular games.

'Table Tennis' was prepared in collaboration with the English Table Tennis Association — over 85,000 copies have been bought by Table Tennis enthusiasts.

The latest title on Ice and Roller Skating has again been prepared by the Association concerned — the National Skating Association of Great Britain.

Still only 2/6d each, the Know the Game series is the best value in books on sport. Details from your local bookseller and sportsdealer or from:

Byes are placed equally at the top and bottom of the draw, and if they are an odd number (as above) the extra one goes into the bottom half.

During the rounds the minimum distance of run back from ends of table shall be 12 feet and 8 feet (Doubles 9 feet) between each table where the tables are side by side and 6 feet between an obstacle and the edge of the table.

THE UMPIRES SCHEME

The aims of the Umpires Scheme are to set a standard of good umpiring and to provide recognition for those of proved ability. This is at once an acknowledgment of the efficient service which the Umpire gives and a help to organisers who have to ensure that matches are controlled by capable people.

The Qualities of a Good Umpire

The Umpire must, first and foremost, know and understand the Laws of the Game. But this is not all; he must have practical ability as well. He must be able to apply those laws promptly and correctly whilst a match is in progress; he must be able to keep the score correctly and to announce it clearly and audibly to both players and spectators; he must have the faculty of controlling a match firmly but tactfully; and he must have an understanding of the importance of the part he has to play in presenting a Table Tennis match before a public audience.

The County Umpire

Those who have this theoretical knowledge and practical ability are invited to qualify firstly as County Umpires. To do this, it is necessary first to answer in writing a set of questions designed to satisfy the County Association Umpires Committee about knowledge and understanding of the Laws of the Game (and the Knotty Point interpretations that go with them). The question paper is not intended as a test of memory—the candidate may spend as long as he likes in answering the questions, and may consult the rule book. The one thing he must not do is to copy out someone else's answers.

Test papers may be obtained from the Secretary of the County Association Umpire Committee, or, where there is no County Association, from the E.T.T.A. Office, 652, Grand Buildings, Trafalgar Square, London, W.C.2.

Those whose written test papers are satisfactory become probationary County Umpires, and may be appointed by local organisers to Umpire any match. As soon as the County Association Umpire Committee representatives are satisfied from actual umpiring at matches played before a public audience, that the probationary umpire possesses a satisfactory standard of practical ability, he is accepted as a full County Umpire, and becomes entitled to wear a County Umpire's badge.

The National Umpire

This qualification is available to Umpires who have held the "County Umpire" qualification for at least three years—who have experience of the highest order and who satisfy the most exacting standards of theoretical knowledge and practical ability.

Examinations for this qualification are conducted annually by the E.T.T.A. and candidates must be nominated by the appropriate County Association. Successful candidates are entitled to wear the National Umpire's badge.

The Umpire's Handbook (Second Edition).

A handbook for umpires has been published by the E.T.T.A. This gives more detailed information about the Umpires Scheme, in addition to much useful guidance for umpires.

The names and addresses of the present secretaries of County Association Umpires Committees are given below.

HINTS ON PLAYING CONDITIONS

by G. W. Decker

Floor:

The table should rest on a wood floor. A linoleum covered floor is not good and the bounce of the ball is affected. Linoleum is all right for footwork but pieces should be cut out for the legs of the table to rest on. The holes must be filled in with small pieces of wood the same thickness as the linoleum. If the cutting is done by an expert the linoleum pieces can be replaced when the table is not in use and the break in the linoleum is hardly noticeable. It has been found that the difficulty of a table on a soft surface where cutting is not possible can be overcome by heavily weighting the table, say 56 lbs. on each leg—4 cwts.

Surrounds:

For exhibitions or special occasions the court should be enclosed by a cloth-covered barrier 2 feet or 2 feet 6 inches high. This can easily be constructed and should be made up in frames 5 feet by 2 feet or 6 feet by 2 feet 6 inches, supported by wooden triangles nailed or screwed at the base of each upright. If the four corner sections of the arena are hinged this will obviate the triangles for eight of the sections. The frames can be covered with green cloth, muslin or sisalcraft which can be glued to each side and then sprayed with green paint. This latter method has been found very satisfactory.

Lighting:

The very minimum for club play and ordinary matches should consist of three 150 watt lamps in 20-inch circular billiard shades—one over the centre of the table and one over each end of the table. A very convenient method is to wire the whole outfit on to an 11 feet beam with a lead to the nearest lampholder and suspend the whole by two chains or cords from the ceiling and six feet apart. The distance from lamp to lamp should be 5 feet 6 inches and the height from the floor 9 feet 9 inches. Unless good lighting is provided in clubs eye-strain and nasty headaches will result.

For Club Room:

Exhibition and Representative Matches:

The playing space should not be less than 36 feet by 18 feet. At the first Championships at Wembley we had 60 feet by 40 feet. The following year it was reduced to 50 feet by 25 feet. Later it was reduced

to 40 feet by 20 feet and has remained at this ever since and is ample. A large area gives the player much further to go when picking up the ball and also dwarfs the spectacle of a player retrieving boundary hits. The thrill of the game is felt much more in the smaller area.

DISTANCE TO FLOOR IS MEASURED FROM BOTTOM RIM OF SHADE

Ten 150 watt lamps are used in 20 inch billiard shades spaced as shown. 200 watt lamps are not too much. Sometimes it is necessary to go much higher with the lights when they obscure the view for spectators in a gallery. Three 1,000 watt lamps on a 16 foot bar at a height of 16 feet will be found satisfactory and gives nearly as much light as the system shown in figure 2. It must be remembered that the light thrown on any given area of surface varies as the square of the distance. A 500 watt lamp at a height of 16 feet (13 feet 6 inches from the table) would not give as much light as a 150 watt lamp at a height of 9-ft. (6 feet 6 inches from the table). For this reason the higher the lights are the more powerful they should be. Lamps with silvered reflecting surfaces, bright metal reflectors, or looking glass reflectors should never be used as their light distributions are very uneven.

Fluorescent lighting presents special problems because of its stroboscopic effect. Some success has been achieved by using dual tubes but experiments and trials are still proceeding.

On the Umpires table a jug of water and glasses should be provided, also towels.

For big international matches scoring machines should be used. It is also necessary to provide stop clocks in case the time limit rule

has to be applied. Chess clocks have been used for the purpose but for real exactitude a stop watch or a clinical clock should be used.

Where a floor is slippery scrubbing is essential, but, in cases of emergency, powdered pumice makes a good surface. Its action is, however, abrasive and may do some damage to a highly polished floor. Rinso has been successfully used on many occasions. It has no abrasive action, but makes the floor sticky without doing any lasting harm.

Resurfacing a table is a very technical job but some very good results can be obtained by amateurs if they are lucky. It is essential that the table's surface be absolutely clean and free from grease. The slightest spot of grease will prevent the cellulose paint from "taking" properly. Preferably, the table should be scraped with an ordinary metal scraper and the surface then made smooth with a fairly fine quality of sandpaper.

The surface should then be made good with ordinary cellulose "filler," which can be obtained from any paint shop, and the green paint should be applied with a cellulose spray gun, with a pressure of not less than 40—45 lbs. per square inch. After the green has been allowed to dry thoroughly, the matting solution should be applied. The white line can be added by hand, but cellulose paint must be used.

The consistency of both the green paint and the matting solution can be correctly adjusted by the addition of the necessary quantity of thinners. It is impossible to lay down any hard-and-fast rules as to the percentages of thinners to be added to the paint, but any good cellulose paint sprayer will be able to judge this accurately.

The paint necessary to resurface one table consisting of green undercoat, matting lacquer and thinners, can be obtained for £3 plus postage. Various firms are resurfacing tables at from £8 to £19 10s. 0d. plus cartage, but as with most things the best is cheapest in the end.

THE CHART SYSTEM FOR ARRANGING LEAGUE FIXTURES

Originally produced in the Handbook in 1938 by Leslie Bennett;
revised and expanded by G. R. Harrower in 1948.

The Chart System has now become a necessity to all Table Tennis Organisers. In order that clubs can compete in leagues, they must be able, if they enter more than one team, to be *certain* that two teams from the same club will not be called upon to play at home in the same week. This can always be *guaranteed*, providing the divisions making up a league have the same number of teams in each, irrespective of whether the two teams are in one division, or separate, and irrespective of how many clubs enter with two teams.

Most leagues to-day publish their own handbook, and the amount of space taken up by printing fixtures is considerable. This can be cut down to a maximum of two pages (including explaining the chart) by using the chart system. Even if you decide to print your fixtures in full, you will find that, to obtain satisfactory fixtures, you must prepare them with the aid of a chart.

The following charts can be used for divisions from 6 to 16 teams: if an odd number of teams, say 7, you give a blank week to the team due to play No. 8 in each case. Use of these charts guarantees that no team is ever called upon to play three consecutive home or away matches, and that they get the maximum possible number of alternate home and away games. Furthermore, by using the combinations shown underneath each chart, you safeguard your clubs and their few match nights. For example, if you have a club with two teams, one in the premier division and one in the third division, with only one home night, allot the first team to position No. 1 in the premier division, and the second team to position No. 5 (for divisions of eight) in the third division. It should be noted that although only four combinations are listed as alternatives for divisions of eight these combinations can be reversed; i.e., 5 and 1, 6 and 2, giving eight combinations for eight places, covering every possibility.

The tables used cover the first half of the season, and the letter "a" denotes an away match. For example, again quoting from divisions of eight, Team No. 1 plays Team No. 8 at home in the first week, and then meets Team No. 7 away in the second week. Obviously, for the second half of the season, the homes and aways are reversed.

Shortage of space precludes giving all details, but further information can be supplied and queries answered if a communication is sent to the Association.

There is a way in which EACH team can play alternate home and away matches, providing that two extra weeks can be devoted to the league programme. Obviously, this is more satisfactory if time permits, and you are recommended to use the charts numbered 6, 7, 8, 9, 10 and 11.

NATIONAL COACHING SCHEME

by JACK CARRINGTON
(Hon. Director of Coaching)

The National Coaching Scheme was inaugurated six years ago, with the following objects:—

To spread as widely as possible a knowledge of correct principles and technique of table tennis;

To interest and enthuse young people in the athletic possibilities of the modern game;

To set standards for instructional work and to promote and encourage the teaching of the game by all possible means, with special emphasis on the building up of a chain of qualified instructors throughout the country.

In furtherance of these aims the National Coaching Committee has sponsored each year a number of short Coaching Courses (for general students), Study Courses (for potential Coaches), and various Rallies for younger players.

The Director of Coaching has also been called upon to arrange instructional programmes; to advise and examine local instructors, on behalf of County or local organisations and educational bodies.

The Committee works closely with the Central Council of Physical Recreation which has helped our sport greatly by the staging of many attractive instructional courses.

The E.T.T.A. Basic Coaching Diploma has been awarded to 69 candidates from 21 counties who satisfied the National Coaching Committee's requirements as to practical ability, theoretical knowledge and teaching, skill, combined with general presentation. The award of this Diploma carries with it the right to wear the official "Coach" badge.

In addition a further 60 candidates have registered as Diploma Students, and their progress is constantly under review.

THE LAWS OF TABLE TENNIS

(As adopted by the International Table Tennis Federation and approved by the English Table Tennis Association)

Singles

1. The Table.—The table shall be in surface rectangular, 9ft. in length, 5ft. in width; it shall be supported in such a way that its upper surface shall be 2ft. 6ins. above the floor, and shall lie in a horizontal plane.

It shall be made of any material and shall yield a uniform bounce of not less than 8ins. and not more than 9ins. when a standard ball is dropped from a height of 12ins. above its surface.

The upper surface of the table shall be termed the "playing surface"; it shall be non-reflecting, of a dark colour with a white line $\frac{1}{2}$ in. broad along each edge.

The lines at the 5ft. edges or ends of the playing surface shall be termed "end lines". The lines at the 9ft. edges or sides of the playing surface shall be termed "side lines".

2. The Net and its Supports.—The playing surface shall be divided into two courts of equal size by a net running parallel to the end lines and 4ft. 6ins. from each. The net, with its suspension, shall be 6ft. in length; its upper part along its whole length shall be 6ins. above the playing surface; its lower part along the whole length shall be close to the playing surface. The net shall be suspended by a cord and attached at each end to an upright post 6-ins. high; the outside limits of each post shall be 6ins. outside the side line on the same side.

3. The Ball.—The ball shall be spherical. It shall be made of celluloid, white, but not brightly reflecting; it shall not be less than $4\frac{1}{8}$ ins. nor more than $4\frac{1}{4}$ ins. in circumference; it shall not be less than 37 grains (2.40 grammes) nor more than 39 grains (2.53 grammes) in weight.

4. The Racket.—The racket may be of any size, shape, or weight. Its surface shall be dark coloured and non-reflecting. The blade shall be of wood, continuous, of even thickness, flat and rigid. If the blade is covered on either side, this covering may be either (a) of plain, ordinary pimples rubber, with pimples outward, of a total thickness of not more than 2 mm; or (b) of "sandwich" consisting of a layer of cellular rubber surfaced by plain ordinary pimples rubber—turned outwards or inwards—in which case the total thickness of covering of either side shall not be more than 4 mm.

Definition: For the purpose of Law 4 plain, ordinary pimples rubber shall be defined as follows:—

A single covering with pimples evenly distributed not fewer than 10 nor more than 50 to the square centimetre (60—330 to the square inch) of rubber which, whether natural or synthetic, is non-cellular, and of which the total thickness includes the height of the pimples and adhesion.

5. The Scoring of Points.—A game shall be won by the player who first wins 21 points, unless both players shall have scored 20 points, when the winner of the game shall be he who first wins two points more than his opponent.

6. The Choice of Ends and Service.—The choice of ends and the right to be server or striker-out in every match shall be decided by toss, provided that, if the winner of the toss chooses the right to be server or striker-out, the other player shall have the choice of ends, and vice versa and provided that the winner of the toss may, if he prefer it, require the other player to make the first choice.

7. The Change of Ends and Service.—After five points the striker-out shall become the server, and the server the striker-out, and so on after each five points until the end of the game or the score 20-all. At the score 20-all the striker-out shall become the server, and the server the striker-out, and so on after each point until the end of the game. The player who served first in a game shall be striker-out first in the immediate subsequent game, and so on until the end of a match.

The player who started at one end in a game shall start at the other in the immediately subsequent game, and so on until the end of the match. Where the match consists of only one game, or, where it consists of more than one game, in the deciding game of the match, the players shall change ends at the score 10.

8. Out of Order of Ends or Service.—If a player serve out of his turn, the player who ought to have served shall serve as soon as the mistake is discovered, unless a group of five services shall have been completed before such discovery, when the service in the subsequent groups of services shall continue in the sequence as originally established, the discontinuity being ignored. In any circumstances, all points scored before the discovery shall be reckoned.

If the players shall not have changed ends when ends should have been changed, the players shall change ends as soon as the mistake is discovered, unless a game shall have been completed since the error, when the error shall be ignored. In any circumstances, all points scored before the discovery shall be reckoned.

9. The Order of Play.—The server shall first make a good service, the striker-out shall then make a good return, and thereafter server and striker-out shall each alternately make a good return.

10. A Good Service.—The service shall begin by the server projecting the ball by hand only, without imparting of spin, up into the air. The ball shall then be struck so that it touch first the server's court and then, passing directly over or round the net, touch the striker-out's court.

The free hand, while in contact with the ball in service, shall be open, with the fingers together, thumb free and the ball resting on the palm without being cupped or pinched in any way by the fingers.

At the moment of the impact of the racket on the ball in service, the latter shall be behind the end line of the server's court and between an imaginary continuation of the side lines.

11. A Good Return.—A ball having been served or returned in play shall be struck by the player so that it pass directly over the net or round the net and touch directly the opponent's court; provided that, if the ball, having been served or returned in play, returns with its own impetus over the net or round the net, it may be struck, while still in play, by the player so that it touch directly the opponent's court.

The player who first strikes the ball during a rest shall be termed the server.

The player who next strikes the ball during a rest shall be termed the striker-out.

The fourth five services shall be delivered by the partner of the striker-out of the first five services and received by the server of the first five services. The fifth five services shall be delivered as the first five services. And so on, in sequence, until the end of the game or score of 20-all, when the sequence of

serving and striking-out shall be uninterrupted, but each player shall serve only one service in turn until the end of the game.

In a one-game match, or in the deciding game of a match of more than one game, the pair that served the first five services has the right to alter their order of striking-out or that of their opponents at the score 10.

22. Out of Order of Striking-out.—If a player act as striker-out out of his turn, the player who ought to have acted as striker-out shall be striker-out as soon as the mistake is discovered, unless a group of five services shall have been completed before such discovery, when the sequence of serving and striking-out shall continue as originally established, the discontinuity being ignored. In any circumstances, all points scored before the discovery shall be reckoned.

Decisions of the Rules Committee of the International Table Tennis Federation

1. Edge Balls.—The phrase, "Table Surface" is to be interpreted as including the top edges and corners of the table-top, and a ball in play which strikes these latter is therefore good and still in play; though if it strikes evidently the side of the table-top below the edge, it becomes dead and counts against the last striker.

2. Ball Returned with Empty Hand.—If a player drop his racket, he cannot return the ball with empty hand. (See definition, "the racket hand is the hand carrying the racket.")

3. Racket Thrown at Ball.—If in returning the ball the racket leave the player's hand, it is a good return only if it were still in his hand at the moment of contact with the ball (see Law 11, "a ball... shall be struck"), and if it does not touch the net or move the table surface (Law 13 c, d) before the ball is out of play.

4. Missed Service.—If a player in attempting to serve miss the ball altogether, it is a lost point (Laws 10 and 15) because the ball was in play from the moment it left the server's hand, and a good service has not been made of the ball already in play.

5. Volleyed Net Service.—A net service is a let not only if otherwise good, but also if it be volleyed by the striker-out. (See Laws 12 (a) and 14 (b).)

6. Open Hand in Service: Physical Disability.—Strict observation of the prescribed method of service may be waived where the Umpire is notified, before play begins, that compliance by the player in question is prevented by physical disability.

7. Ball Fractured in Play.—If the ball split or becomes otherwise fractured in play, affecting a player's return, the rest is a let (Law 12c). It is the umpire's duty to stop play, recording a let, when he has reason to believe that the ball in play is fractured or imperfect; and to decide those cases in which the faulty ball is clearly fractured in actually going out of play, and in no way handicaps the player's return, when the point should be scored. In all cases of doubt, however, he should declare a let.

8. **Fixtures.**—A moving spectator, a neighbouring player, a sudden noise, i.e., any neighbouring object in movement (except a partner) should be regarded as an accident not under control (Law 12c), interference from which implies a let. A stationary spectator, fixed seating, the umpire, the light, a nearby table, a continuous sound of even volume, i.e., any relatively constant or motionless hazard, should not be so regarded, and complaint against interference from it during play should be regarded as void.

THE SERVICE LAW

Law 10. A GOOD SERVICE

The service shall begin by the server projecting the ball by hand only, without imparting of spin, up into the air. The ball shall then be struck so that it touch first the server's court and then, passing directly over or around the net, touch the striker-out's court.

The free hand, while in contact with the ball in service, shall be open, with the fingers together, thumb free, and the ball resting on the palm without being cupped or pinched in any way by the fingers.

Knotty Point 6. OPEN HAND IN SERVICE: PHYSICAL DISABILITY

Strict observation of the prescribed method of service may be waived where the Umpire is notified, before play begins, that compliance by the player in question is prevented by physical disability.

This service law is in force throughout the table tennis world, and must be observed in all organised play by clubs and individuals affiliated to the E.T.T.A.

A GUIDE TO TABLE TENNIS PUBLICITY

BY CONRAD JASCHKE

Hon. Press Officer E.T.T.A. and Hon. Publicity Secretary
National County Championships

PUBLICITY AT LEAGUE LEVEL

The value of publicity has become widely recognised in Table Tennis in recent years, and there are few leagues now without an official responsible for this aspect.

To obtain publicity at league level is relatively easy, as witnessed by the flood of press cuttings which descend on the E.T.T.A. office during the season. Local newspapers usually consider local sporting activities as of paramount importance, and good local sports coverage is recognised as having a strong bearing on circulation figures of local newspapers.

Publicity officials know best what are the requirements of their particular papers, but here are a few tips which—though not applicable in every single case—will be found useful in most cases:

1. Send your reports typewritten in double spacing, written on one side of the paper only, and make sure the report bears your name, address, telephone number, and the name of the league on whose behalf it is sent. All this helps the sports editor considerably.
2. Experience will show how long a report each paper can use. It is advisable to keep to that length each week; for instance, one foolscap sheet in double spacing will be considered a reasonable length by many papers, though some might well use twice that much. Whatever you find suitable, keep to more or less the same amount each week, and the sports editor will soon come to rely on filling a pre-determined amount of space with Table Tennis each week.
3. The sports editor of a weekly paper appearing on Friday will usually ask you to let him have copy by Tuesday morning; he may well say that there is no need to send it earlier. Yet I can assure you from personal experience with numerous local newspapers that if you are able to so arrange matters as to send copy one day earlier than expected (in this case by Monday), your chances of obtaining the regular space you desire improve tremendously.
4. The subject matter of articles should deal predominantly with local players and events. It is no use telling the Puddledock Gazette that Berczik beat Leach by winning 10 consecutive edge balls when 11-19 down in the fifth—chances are they couldn't care less. But tell them that A. Dogsboddy from the 8th division of the Puddledock League beat B. Jones who plays in the 4th division—and the Puddledock Gazette would have to be a very unusual local paper not to give considerable prominence to this happening.

5. It does not follow that national news can never be of interest, but remember always to bring in some local angle if dealing with news from further afield. Show how this news affects the local league, or quote some local official's comment thereon, and you are certain to increase the local news value of any news item with a national theme. There are some exceptions, i.e. local newspapers who do specialise in using news from a larger field, but they are fairly rare, certainly as far as the sports pages are concerned.
6. Local league results should be sent every week, and league tables periodically. If local papers can be persuaded to send a photographer to some events, such as to a Closed Championships, this is very valuable, as articles accompanied by photos are often read by members of the public who might otherwise skip the Table Tennis column. That a photo of a pretty girl playing Table Tennis is one of the finest adverts for the game is, I am sure, no secret to anyone dabbling in publicity work!
7. It is very important to obtain varied information in order to keep any column interesting, and therefore any official in charge of publicity has to be in constant touch with local players and clubs. For this reason an active player often makes a successful publicity secretary. My experience has been that once local players and officials realise that the publicity secretary is able to get their activities mentioned in the press, they are only too glad to co-operate by handing on information.
8. It stands to reason that a publicity secretary's work is made much easier if he is easily reached per telephone, but I have known people do the job successfully without that facility, though they usually will have to work much harder to get the news.

PUBLICITY AT COUNTY LEVEL

Translated into the wider sphere of a County, the points mentioned in the preceding paragraph also apply, in modified form, to county publicity. There are, however, some additional pointers which may be of value:

1. It is really essential to appoint a County Press Officer specifically for this job, and to give him every help in obtaining information. It is usual to give this official sight of all correspondence which contains items of news value, and to allow him to sit in on sub-committees etc. where matters of interest are discussed.
2. The County P.O. will need to use a lot of tact in co-ordinating Table Tennis coverage throughout a county. Often it may be best for the County P.O. to desist from servicing papers which already receive an adequate service from the local league, as otherwise conflicts can arise. In some cases the local publicity secretary might prefer it if the County P.O. sends him any news items of interest to the county, so that they can be woven into local reports.

3. However, the County P.O. must definitely be the person in charge of Table Tennis publicity in newspapers with a wider circulation — the County Papers. Here news should always be from the county angle, i.e. details of county teams, inter-league competitions, the happenings on the county committee, and national news with a bearing on the county. I cannot sufficiently stress the importance of the County Papers, and it will be found that other sports go to great trouble to get coverage in these papers, as the prestige value of having weekly county columns in these papers is great.
4. I think it is advisable for every County P.O. to keep a book of press cuttings as a permanent record, which will be found very useful for reference purposes.

PUBLICITY ON THE NATIONAL LEVEL

The fact that the E.T.T.A. have now appointed their own Press Officer does *not* mean that other publicity officials cannot make a contribution nationally — quite to the contrary.

It must be remembered, of course, that to get Table Tennis into the National Press is extremely difficult, because of the shortage of space available to what is termed, quite wrongly, "minor sports". Some items find their way into national columns, but they may perhaps represent as little as 1% of what is actually sent.

County P.O.'s in particular can, I feel, make a valuable contribution if they will send items which have some national news value, from their own county, either to the E.T.T.A. Press Officer, or direct to national newspapers. Even if most items do not see the light of day, there is an accumulative effect of widespread interest created in the minds of national sports editors, and the value of this is not to be underestimated. As a rule it is slightly easier to get Table Tennis into evening papers, rather than into national daily morning papers.

I am convinced that if a number of County P.O.'s were to bombard the National Press with regular handouts throughout one season, the benefits to national publicity would be quite startling.

A great deal is, of course, being done by the E.T.T.A. to make the National Press "Table Tennis conscious". For instance, during the season news handouts are sent to agencies and newspapers several times a week, gossip items are widely disseminated, and press conferences are held.

THE PERSONALITY ANGLE

Table Tennis suffers from a lack of personalities. It is up to all of us who work in the publicity field to do something about it.

The first thing to realise is that there are many potential personalities, but they have to be given a certain amount of build-up to arouse public interest. A player cannot be successfully presented as a personality unless he or she has talent, and is the right type for this treatment — it is disastrous to select a "big-head".

It is very difficult to generalise on a subject which is essentially one of individual circumstance. However, to give an example, let us assume we are dealing with one of the weaker counties, who have a promising young player coming along. If that player is of pleasing appearance and personality, and looks like reaching international class, this would be a typical case where the County P.O. should go to special trouble to interest the local and regional press.

Build-up publicity has an accumulative effect. The County P.O. should follow the players' career, and keep as many newspapers as possible advised of the player's successes, and of progress in tournaments, county matches, or national events. The player should be encouraged to develop distinctive characteristics, though these must not cross the line into "showing off".

If newspapers continually hear of a player's successes, the sports editors themselves will normally show interest in the player's hobbies, background etc., and this trend should be encouraged by the County P.O. All this means a lot of extra effort on the part of the County P.O. but it is likely to pay off handsomely if the player becomes established as a local sporting personality. People who might not normally attend will come along to see a player they have heard about, and the overall results can be of great benefit both to the player, and to the local league and county.

It is obvious that this is a tricky field, requiring more tact and caution than ordinary publicity work. On the other hand, successes in this field are likely to result in more tangible benefits.

CONCLUSION

It may not be widely known that the E.T.T.A. Press Officer's terms of reference stipulate that he is to co-operate with leagues and counties in every way. Therefore I take this opportunity to invite all publicity officials who have any queries, problems, or views they wish to air, to contact me, and I shall be very pleased to give whatever assistance I can, or to put interesting views to the National Executive Committee.

Letters can be addressed to my home address, at 35 Eynswood Drive, Sidcup, Kent, or c/o E.T.T.A., 652 Grand Buildings, Trafalgar Square, London, W.C.2. I can be reached on the phone at FOOTSCRAY 5845 most evenings after 7 p.m., or at weekends. The E.T.T.A. Secretary can reach me at any time of day in cases of urgency.

I do hope that club, league or county publicity officials will not hesitate to contact me if I can be of any service whatever.
